

README!

Thank you for downloading the asset! Hope you will enjoy it.

The project was created in Unity Version: 2021.3.14f1.

The package contains 5 texture sets. You can put your own texture on a puzzle, just change the image in T_Puzzle_Image or create your own with the same resolution.

If you experience problems with Rigidbody on Jenga Blocks, consider scaling up the block.

Use "Linear" color space for better colors.

If you want to use URP shader and see all textures pink just upgrade materials using Edit -> Render Pipeline menu.

Some models have custom colliders for better collision.

Contact me, if you have any questions regarding the project!
